

BIZEXC LLC

Automation as a Managed Service

Balancing a software system's performance and feature set against its release date is a critical decision point for software development groups. Making sure it functions as designed and does not interfere, damage or impair customers and users is a business imperative.

In the midst of unprecedented need for continuous change and quality improvement to meet today's demanding business environment, BIZEXC is delighted to introduce RegressionPak®, our latest innovation for software testing and test management. RegressionPak® is critical for companies striving to deliver high-quality software on time and within budget. RegressionPak® is the best way to ensure the success of your mission-critical software systems. The RegressionPak® Solution has been carefully designed, as a reliable, repeatable, scalable and practical solution that enhances quality, reduces costs, and gets you to market faster. BIZEXC are experts in rapid software test automation for regression packs and utilize an advanced set of tools to deliver on time automated testing services that will help your development organization meet its business goals.
